PROJECT SCOPE STATEMENT	
Project Name	Math Blitz
Project Deliverables	**Detailed Description**
Math quiz	The main deliverable is a math quiz game targeted at an elementary level. The scoring will be a simple count of how many questions were answered correctly.
Multiple choice questions	The questions will have a finite number of potential answers to pick from.
Randomly generated questions	The questions and their respective answers will be randomly generated instead of being from a database.
Arithmetic selection	The player can select which arithmetic (addition, subtraction, etc.) they want to test.
Single player mode	The game is intended to be played by a single player/team.
Proper design	The site layout should be straightforward and easy to use considering the target audience being elementary students. The site design and aesthetics should be modern and not outdated.
Desktop oriented	The website must work from a browser on a desktop.
Project Exclusions	
Multiplayer modes	
Time limits for answering	
Selectable question difficulties	
Different topics/subjects	
Mobile website
